

Spiralite

Glue-fix to columns

1. Friction fit and glue 100mm wide noggings, flush with flange toes at top and bottom of the column, also at board joints (4 sided detail).

Note: for 2 and 3 sided details fit noggings at 500mm centres.

2. Cut web panels equal to depth of section and secure on noggings with Rockbond WR adhesive and wire nails fixed askew at 200mm max centres.

3. Cut flange panels to width of section, plus 2x nominal protection thickness. Secure both edges onto web panels using Rockbond WR adhesive and wire nails fixed askew at 450mm max centres.

NOTES

1. Nogging thickness to be same as protection thickness with a minimum of 30mm.
2. Rockbond WR adhesive to be used on all board to board joints.
3. Nail length = 2 x Protection Thickness.
4. Nogging to be placed at top and bottom of column.

The information contained in Cryotherm data sheets is believed correct at the time of publication.
